

LONG-TERM CARE is the #1 Financial Risk faced by retirees. US Govt. statistics tell us that 70% of Americans over 65 will eventually need long-term care for an average of 30 months

You are Cordially Invited to join us for lunch to explore the most sensible planning solution to address this risk.

- When serious illness or end-of-life issues occur, the need for professional care is great and the cost will demand a significant increase in retirement income. A simple adjustment within your investment portfolio should contain an account that will **provide substantial added income when professional care is needed in your home or a special facility.**
- **The money you move into this account should be fully Guaranteed**
- **You should have Guaranteed access to it any time**
- **And if never needed, a fair tax-free rate of return to your heirs**

Come see why this is the number one growing financial strategy in the country.
